

**NEW!**

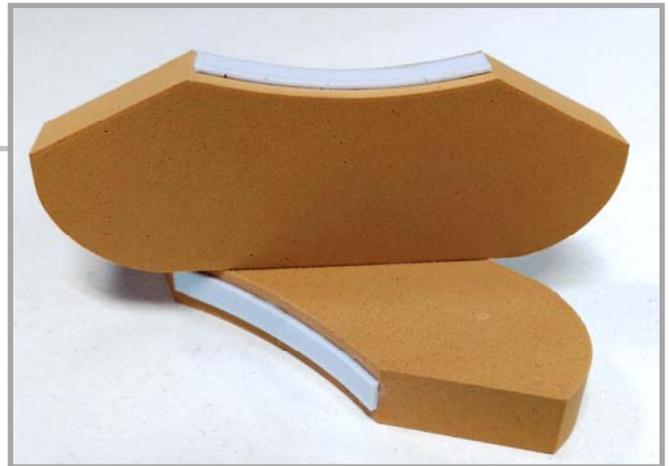

### CBG SUPERLIFE FLEXO END SEALS

The new **SUPERLIFE** Flexo End Seal from CBG in Italy represents a major step forward in sealing of all Flexographic Ink Chambers and Ink Trays.

This Innovative two piece construction is designed to provide the absolute best wear resistance as well as snug end sealing to provide the longest wearing seal on the market today. Available in most popular shapes and sizes as well as custom cutting for other presses.

Resilient 30° Shore A Durometer Solvent Resistant Flexo 3 Rubber compound. Provides medium low hardness and very high density for very high wear resistance.

Long Life durable Polymer compound chemically bonded to the seal face provides complete protection and excellent sealing capabilities for up to 1.5 million runs.

Precision Laser Cut to exact press dimensions and specifications.
