

**LOOKING FOR THE RIGHT FABRICATING MATERIAL? CHANCES ARE, WE HAVE IT!**

### QUICK GUIDE TO OUR FABRICATING MATERIALS

## CUSHIONING MATERIALS

<b>Poron®</b>	Acknowledged worldwide as the premium lightweight shock absorbing foam. Now available in a number of formulations to meet specific patient requirements.
<b>Plastazote®</b>	Lightweight, non-allergenic, flexible foam that is easily thermoformed and fabricated. Ideal for diabetic and arthritic patients.
<b>Opulex™ Plus</b>	Alternative cushioning and covering material made of a durable open cell rubber base with stretch nylon top cover.
<b>Opulex™ Soft</b>	Alternative cushioning material made of a neoprene base with a stretch nylon top cover.
<b>Opulex™ Performance</b>	The newest addition to our range. Opulex Performance offers higher wearing capabilities than traditional neoprenes. It offers high shock absorption and will not delaminate. Covered with a 4 way stretch nylon top cover.
<b>Multi Durometer</b>	Various combinations of Poron, Plastazote & EVA in sheets for economical & time saving fabrication

## SUPPORTIVE / STRUCTURAL MATERIALS

<b>Microcell EVA</b>	High quality, long lasting EVA's in a wide range of colours and densities, to suit a variety of applications.
<b>Multicork™</b>	A thermoformable EVA/Cork combination that is lightweight and firm.
<b>Polypropylene</b>	<ul style="list-style-type: none"><li>• Homopolymer polypropylene with excellent impact resistance.</li><li>• HDPE, a high density polyethylene for more rigid orthotic devices.</li></ul>

## TOP COVERS

<b>Proliner</b>	Competitively priced Top Cover Fabric with excellent abrasion resistance.
<b>Cushmax</b>	Latest technology fabric offering high abrasion resistance, continuous wicking of moisture, antimicrobial and soft hand.
<b>Vita Plus</b>	Leather look, offering high breathability, perspiration absorption & desorption, soft hand, easy molding.
<b>Alfa Pig</b>	Pig Skin Finish Top Cover with great performance and soft hand.
<b>Agotex</b>	Durable substitute for natural suede with resistance to mildew, rot and odour.
<b>EVA</b>	Wide range of low density, 2mm EVA's ideal for top covers.

## Other

<b>Vibram</b>	Durable Heel Post cover
<b>Adhesive</b>	Glue Pots & Brushes, multi use Jet Set adhesive
<b>Prefabricated components</b>	Molded footbeds, Poron Met Domes & Bars
