

# EVA Top Covers

The top cover of an orthotic is directly in contact with the foot and so it plays a critical role in the comfort of the patient through moisture management, cushioning, cossetting, warmth and friction.

**Our Microcell and Premium EVA Top Covers offer a range of shore hardnesses and features to address all needs, whether required for diabetic/arthritis patients, children, sports applications or general wear.**

## Microcell EVA Top Covers

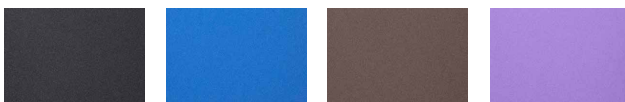

We offer an extensive range of standard EVA foams, which provide reliable top cover performance for orthotics. Our Microcell EVA Top Cover range includes plain and multicolour products. Firmer grades of EVA Top Covers are also available in popular colours.

# Puzo Premium EVA Top Covers

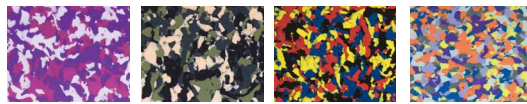

This sophisticated range of high quality EVAs has been specifically developed for the orthopaedic market. Each grade has a unique set of properties to meet individual production requirements, practitioner prescriptions, lab designs and patient needs. Our Puzo Premium Top Covers have a silky smooth surface & excellent tear strength and provide outstanding cushioning. Due to their purity, our Premium Top Covers do not exhibit the typical EVA odour so often experienced with standard EVA foams.
