## PORON® XRD™ – EXTREME IMPACT CUSHIONING

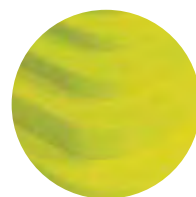

Like all PORON® products, PORON® XRD™ is a microcellular, open cell engineered foam. The difference is its behaviour under high-speed impact where the foam instantly dissipates the force upon impact by forming a protective shell and then relaxing for the next impact. Absorbs and dissipates up to 90% of the energy when impacted at high strain rates.

All the standard PORON® cushioning properties you rely on:

- Contouring, soft and flexible
- Open cell breathable technology
- Resistance to compression set
- Does not contain Latex, PVCs, VOCs or heavy metals
- Contains Microban antimicrobial protection to prevent growth of bacteria that cause stains and odours.

PRODUCT CODE	DESCRIPTION	COLOUR	SHEET SIZE (MM)
<b>PORXRDMA-15118</b>	Poron Extreme Impact Protection with Microban 3.0mm	Yellow	1,372
<b>PORXRDMA-15236</b>	Poron Extreme Impact Protection with Microban 6.0mm	Yellow	1,372
<b>PORXRDMA-15374</b>	Poron Extreme Impact Protection with Microban 9.5mm	Yellow	1,372
