

Cleaning Equipment

Avflex Australia are pleased to now partner with IRAC Cleaning Solutions in Italy to provide our customers the very best & safest pressroom cleaning solutions in the market today. Innovative new SAFE alternatives to conventional cleaning tasks to provide improved staff OH&S, real cost savings, maximised productivity, less downtime and less waste.

SR LC MINI Automated cleaning of plates or screens. Washes both sides at once with "slide in" carrier. Fully sealed for protection for staff and plant. Semi Auto (LST & LSRT) or Fully Auto (ALS & ALRS) versions in 2 sizes 1000 x 1000mm or 1400 x 1200mm. Cleaning, washing and rinsing fully programmable to allow optimization of different cleaning programs. Exclusively pneumatic for flammable areas.

SE LC MANUAL PLATE/ SCREEN WASH. Safe and efficient cleaning of printing plates, parts, tools, containers, silk screen frames. Fully pneumatic and can be used with flammable or non-flammable solvents. Supplied with two self-feed brushes (fed by the pneumatic pump) to combine a mechanical action with the chemical action of the solvent.

VERTICAL WASH Self contained washing for corrugated clichés and plates. Designed to wash all waterbased flexo inks from plates in a sealed booth so operator is never in contact with the cleaning chemical for increased OH&S.

3 Versions & 2 Sizes:

VW Manual: Washing.

VW Basic: Wash, rinse & dry. Manual

VW Evolution: Fully automatic wash, rinse & dry.

FL ROLL CLEAN: Cleans print cylinders, screens, sleeves, rollers, ink trays, ink chambers in one cycle.

Top section features continuously rotating shafts to rotate print screens, cylinders and anilox rollers and lower section has a large bay with fixed jets for trays and parts.

4 sizes with optional automatic operation all pneumatic for safety with flammable cleaning agents and with re-circulation of cleaning liquids

FL BASIC and FL ALLCLEAN Are universal jet wash systems for cleaning ink fountains, trays, sleeves, anilox rollers, mechanical components and tooling.

FL Basic & FL Allclean feature a large internal shelf surrounded by an array of fixed nozzles that effectively spray cleaning solvent.

FL ALLCLEAN has a moving basket carrying parts with longitudinal movement of 10-15 cm to improve the mechanical action.

LP COMPACT 60 (right) designed to clean single pails inside and out with twin jets. Manual and auto options and safe for flammable liquids.

FLPW PAIL WASH (left) Manual or auto cleaning of pails. Fully Stainless Steel and pneumatic for use with flammable liquids with optional air drying. Cleans inside and out in 2 or 5 pail option.

AV SOLVENT RECYCLER Available in sizes from 15-200 litres, exclusively designed and manufactured to meet the complex needs of recycling solvents and providing substantial cost benefits.

Can be supplied in ATEX EX II 3G (Zone 2) or ATEX II 2G EX explosion-proof for hazardous areas (Zone 1) all UL Certified.

CPV 3 DRUM COMPACTORS: Hydraulic Vertical Drum Compactors.

Minimise waste volumes for massive cost savings. Contact us for a tailored solution to your needs.
